

Press Release

Natural refrigerant equipment keeps shecco employees cool

Brussels, 10 July 2014: shecco is proud to announce the procurement of two hydrocarbon refrigerant appliances offered by Blupura and True Manufacturing at its Brussels headquarters.

"Thanks to Blupura's hydrocarbon water fountain and True's hydrocarbon bottle cooler, we can now showcase natural refrigerant technology here in our Brussels office, as well as enjoy perfectly chilled drinks," says Clemence Girard-Reydet, shecco's Events Manager. *"This is just the beginning, as we intend to continue adding more examples of the technology throughout our office network",* she adds.

Blupura, an Italian manufacturer of high quality and high design drinking watercoolers for the HORECA and hospitality industries, is the first watercooler manufacturer in the world to use compressors with natural refrigerant gases (hydrocarbons) with zero impact on global warming. The hydrocarbons21.com bronze partner supplied shecco with a still water cooler from its BroadCasting Cooler – Vision range employing the natural refrigerant hydrocarbons. The state-of-the-art appliance features a display screen, an internal drip tray with drainage, anti vandal stainless steel dispensing keys, a robust stainless steel housing, and an inlet safety valve. The unit achieves a cooling capacity of 30lt/h, a supply capacity of 10lt/h and cool water temperatures between 3°C and 10°C.

True Manufacturing, an industry leader in commercial refrigeration for over 65 years with a continued focus on quality materials, design, availability and performance, has developed a comprehensive series of plug-in bottle coolers operating with the use of natural refrigerant R290. The ATMOAmerica 2014 silver sponsor recently provided a GDM-08N-HC-LD1 small single door plug-in cooler from its natural refrigerant series for shecco's Brussels office. The environmentally benign appliance has a cooling capacity of 211 lt and requires only 71 g of refrigerant charge.

About shecco

For more than a decade market development expert shecco has been active in helping bring climate friendly technologies faster to market. shecco supports over 100+ partners worldwide in the HVAC&R sector, where the focus is on sustainable refrigeration, heating & cooling technologies using natural refrigerants. shecco offers a variety of services in three areas: 1) media & publications, including online industry platforms and a catalogue of dedicated research reports; 2) business development, including market research, consultancy and public affairs services, as well as special international projects; and 3) events, including international conferences and national workshops.
